PROFESSIONAL EXPERIENCE

QA/TEST ANALYST

Royal Caribbean Group

July 2023 - Present

Makati City, Metro Manila

- Built and maintained automation for REST and SOAP web services supporting high-volume transactional systems.
- Worked closely with backend developers to align testing efforts with API design and system architecture.
- Improved the reliability of existing API functional test scripts through comprehensive validation checks and fixing failure points.
- Significantly enhanced the maintainability of 1,000+ cruise reservation API services test cases by implementing dynamic test data generation.
- Contributed to the development of automated web UI testing of a payment gateway web utility.

SOFTWARE TEST ENGINEER

Toshiba

September 2022 - July 2023

Biñan City, Laguna

- Evaluated a command line interface and browser-based application used to manage enterprise Hard Disk Drives' behavior.
 - Modified and maintained existing Python automation scripts for regression and functional testing of the application's command line interface.
 - Assisted in the development of the UI automation test scripts for the browser interface of the application, using Python and Selenium.
 - Performed regression testing cycles and managed test environments to ensure stability and readiness for deployments.
-

PROJECTS

PLAYWRIGHT SAUCEDMO AUTOMATION FRAMEWORK

<https://github.com/earlbertmercado/playwright-saucedemo-java>

A scalable Playwright-Java automation framework, leveraging Page Object Model Design Pattern for easier maintenance, reliable execution, and detailed test reporting.

RESTASSURED PETSTORE AUTOMATION FRAMEWORK

<https://github.com/earlbertmercado/restassured-petstore>

A data-driven test automation framework for the Swagger PetStore API with integrated logging and reporting.

EDUCATIONAL BACKGROUND

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

Batangas State University

August 2018 - August 2022

Batangas City, Batangas
